Hooke Research Fellow
Vacancy Reference: 147713
Grade: 7
Appointment Term: 36 months
Closing Date: Monday, November 2, 2020 - 12:00

We are looking for a talented postdoctoral researcher to take up a Hooke Research Fellowship here at the Mathematical Institute, University of Oxford. This prestigious Fellowship is full-time, fixed-term up to 36 months, and provides an ideal opportunity for candidates to pursue an independent research programme in the mathematics of data science. The Department is also advertising a similar fellowship scheme for a Titchmarsh Research Fellow, for candidates who would like to pursue research in pure mathematics. There will be one appointment made to each of the Hooke and Titchmarsh Fellowships in this recruitment. Applications for job shares or for part-time working to accommodate family circumstances will be considered.

Candidates for the Hooke Fellowship should have research interests compatible with those of our current faculty in the Data Science research group. Further information on the group and its members can be accessed at https://www.maths.ox.ac.uk/groups/data-science. You should clearly mention within your supporting letter one or more research group members you could envision working alongside as a potential mentor or future collaborator. The successful applicants will be talented researchers, who have already produced excellent research during their PhD and in any postdoctoral positions. They will be free to conduct their own research programme.

To aid the development of their academic profile, Fellows will be required to contribute up to 3 hours of departmental teaching per week for the 24 weeks of each academic year, averaged over the period of the Fellowship to allow for extended visits elsewhere.

Candidates will have, or be close to completing, a PhD in mathematics or a related discipline. They must show evidence
of independence and the ability to undertake research of the highest academic standard; hold an outstanding record of papers published in major international journals (commensurate with career stage), some of which should have a clear data science focus; and have a realisable and relevant research plan, relevant to the existing activities and/or expertise of the Data Science research group, which would enhance the research profile of the Mathematical Institute. Additional information about the post, and a full list of selection criteria, are available in the job description.

To apply, please visit - https://my.corehr.com/pls/uoxrecruit/erq_jobspec_details_form.jobspec?p_id=147713

Please direct informal enquiries to the Recruitment Coordinator at the address below, quoting vacancy reference 147713.

Please note that applicants will be selected for interview purely based on their ability to satisfy the selection criteria outlined in the attached job description. You will be required to upload a supporting letter setting out how you meet the selection criteria, a curriculum vitae including full list of publications with top three papers starred, a statement of research interests including a plan for research during the Fellowship, and the names and contact details of two referees as part of your online application. (NOTE: Applicants are responsible for contacting their referees and making sure that their letters are received by the closing date.)

Only applications received before 12.00 noon on Monday 2 November 2020 can be considered. Interviews are due to take place on Monday 30 November 2020.

---------------------------------------------------------------

2) Tenure-track or tenured full-time position in Mathematical Optimization, UCLouvain

De      : Michel Thera

UCLouvain invites applications for a tenure-track or tenured full-time position in Mathematical Optimization: https://jobs.uclouvain.be/PersonnelAcademique/job/An-academic-position-in-Mathematical-optimization-%281-FTE%29/624610701/

Possibly also of interest an academic position in Automation and process control:
and an academic position in Mathematics for Artificial Intelligence:

The deadline for applications is Monday, November 16, 2020 at noon.

For more information about UCLouvain's ICTEAM institute and the Louvain School of Engineering, please visit:

3) 31st EURO conference to be held in Athens

De      : Olivier Cots
Lien    : https://euro2021athens.com

FIRST ANNOUNCEMENT AND CALL FOR PAPERS

https://euro2021athens.com/

31st EURO conference to be held in Athens.

The Program Committee, chaired by Rudolf Vetchera, and the Organizing Committee, co-chaired by Nikolaos Matsatsinis and John Psarras, are preparing a high-quality scientific program and an exciting social program for the Conference.

After a year of lockdowns and limited travel, we are optimistic that the EURO 2021 Conference will again provide an excellent opportunity for the OR community to meet in person in a city that in a unique way stands for the identity of Europe. EURO 2021 acknowledges that virtual conferences can't entirely replicate the conference experience, which normally involves face
to face meetings and networking opportunities. However, Euro 2021 is fully prepared to adjust its strategy in case of any similar situation and to convert the physical congress to a hybrid or virtual one, with the main objective that the new format will continue to meet the needs of the EURO 2021 community and to ensure a viable future for the association's activities in scientific education and professional support. Registered participants will still be eligible to participate, authors whose abstracts were accepted will be published in the digital abstract book, with e-posters available for virtual consultation and industry to have a wide selection of sponsorship opportunities.

PLENARY, KEYNOTE & TUTORIAL SPEAKERS:

We have selected several outstanding Plenaries & Tutorial Speakers that will present the state-of-the-art in Operations Research and outline pathways of its future developments. More information on speakers and their presentations will be announced soon. Please follow up further information at the EURO 2021 Conference webpage: https://euro2021athens.com/.

CALL FOR PAPERS AND SESSIONS:

Researchers, academics, practitioners, and students interested in any branch of Operational Research, mathematical modelling or economic analysis are invited to submit abstracts or organize sessions.

Invited and contributed papers will be organized in parallel sessions. In general, sessions will be a part of the Conference streams, and streams are grouped in different areas. The list of areas and streams will be available shortly.

Abstract submission system is available online, via the
Conference web page
(https://euro2021athens.com/).

Abstracts must be written in English and contain no more than 1,500 characters in plain text format (no formulas are allowed). Submission deadline: February 28.

Researchers who wish to organize a stream or an invited session or contribute with a paper within an invited session should contact a Program Committee member of the corresponding area.

KEY DATES AND DEADLINES

Abstract submissions start 20.09.2020
Abstract submission deadline 28.02.2021
Notification of abstract acceptance deadline 28.03.2021
Registration Opens 14.02.2021
Early bird registration deadline 02.05.2021
Late registration deadline 16.05.2021
Delegation registration deadline 20.06.2021

REGISTRATION FEES:

Registration fees (including VAT) apply:
Regular Early until May 2nd, 2021 (inclusive): 400 EUR
Regular Late until May 16th, 2021 (inclusive, only authors): 500 EUR
Regular Late until June 20th, 2018 (inclusive, just for attendants) 500 EUR
Student/retired Early until May 2nd, 2021 (inclusive): 200 EUR
Student/retired Late until May 16th, 2021 (inclusive, only authors): 300 EUR
Student/retired Late until June 20th, 2021 (inclusive, just for attendants): 300 EUR
Accompanying persons: 120 EUR
Conference Dinner: 80 EUR

Regulations for Participants
Author registration: For each accepted paper at least one registration is required, and each participant may present one paper.

CALL FOR EXHIBITORS:

Parties interested in having a booth or exhibition area during
the Conference are kindly requested to contact sponsors@euro2021athens.com. An exhibitor's guide will be available shortly.

FURTHER INFORMATION:

For detailed information about EURO 2021, please, visit the Conference webpage.

For any further information: info@euro2021athens.com

We look forward to welcoming you to our very exciting conference in Athens!

Rudolf Vetschera, Nikolaos Matsatsinis, John Psarras

5) Dynamic Control and Optimization, February 3 to 5, 2021

De   : Jean-Baptiste Caillau
Lien  : https://sites.google.com/view/dco2021

The Dynamic Control and Optimization International Conference 2021 (DCO 2021) will take place at University of Aveiro, Campus of Santiago, from 3 to 5 February, 2021 (Wednesday-Friday). The conference is dedicated to the 65th birthday of Andrey V. Sarychev, Professor in University of Aveiro until 2002.

The conference is organized by the Department of Mathematics of the University of Aveiro, the Center for Research & Development in Mathematics and Applications (CIDMA, University
of Aveiro) and the Center for Applied Mathematics and Economics (CEMAPRE, University of Lisbon).

Aims and Scope

The conference include topics in research in the areas of (but not limited to):

- nonlinear dynamical control systems,
- control of evolution PDE,
- optimal control,
- sub-Riemannian geometry,
- ordinary differential equations,
- calculus of variations,
- differential equations,
- propagation of acoustic waves in elastic media.

The conference will consist of invited plenary talks (40 minutes + 5 minutes of q&a) and contributed paper presentations (20 minutes + 5 minutes of q&a).

Selected full papers of this conference will be published in an international journal.

Due to the COVID-19 situation and the possible lockdown, the conference is planned to be held in two simultaneous ways:

- attended at the University of Aveiro, Aveiro, Portugal;
- virtually using Zoom

To ensure that all conference attendees have access to all sessions, it is planned to transmit the sessions online or provide access to their recordings.

Regardless of how we handle the conference, we want to assure everyone that there will be a forum for contributors to share their work and participants to learn and network.

Optimization Seminars Center for Mathematical Modeling – U. de Chile

website: https://eventos.cmm.uchile.cl/optimseminar/

Optimization and equilibrium models pervade mathematics and science. They have become central for decision making in industry. Our research has grown increasingly diverse as a result of our academic and industrial interactions.
Our competence in convex and nonlinear programming, nonsmooth dynamical systems, stochastic optimization, semi-algebraic optimization, variational analysis and game theory, combined with our engineers’ expertise, allow us to address relevant industrial problems from a multidisciplinary perspective.

-----------------------------

8) Variational Analysis and Optimisation Webinar
De : Michel Théra
Lien : http://www.mocao.org/va-webinar/
Variational Analysis and Optimisation Webinar
website: http://www.mocao.org/va-webinar/

Many high quality online optimisation seminars have come to life recently. This is a positive by-product of the current unfortunate epidemiological situation. The series focuses on Variational Analysis, a key research interest for many Australian mathematicians. However, we are not going to erect walls and are happy to consider both variational analysis and mathematical optimisation broadly.

Since the organisers reside in Australia, our targeted time zones are different from those covered by the existing online optimisation seminars: afternoon in Australia, New Zealand and most of Asia, and morning in Europe. We apologise to our colleagues in North and South America.

We stand with the under-privileged communities in science and education and all those striving against all forms of racism and discrimination.

9) Relatively New Tunisian Journal of Mathematics
De : Jérôme Bolte
Lien : http://www.tms.rnu.tn

The Tunisian Journal of Mathematics (TJM) is an international publication organized by the Tunisian Mathematical Society and published in electronic and print formats by MSP in Berkeley. It publishes research articles in all areas of mathematics. These will be selected by a distinguished, international board
of editors based on outstanding quality and interest, and according to the highest international standards.

The purpose of TJM is the advancement of mathematics. Editors evaluate submitted papers strictly on the basis of scientific merit. All articles submitted to this journal are peer-reviewed. The TJM uses a single blind peer-review process which means that the reviewers know who the authors of the manuscript are, but the authors do not know who the peer reviewers are.

The African continent is increasingly interested in scientific development, particularly in mathematics. The Tunisian Mathematical Society was founded in 1992 and is a permanent institutional member of the International Mathematical Union. It plays a major role in stimulating and sustaining high level mathematical research in Tunisia and its surrounding region. With the launch of this journal, the Tunisian Mathematical Society contributes to the development in Africa of scientific research meeting high international standards.

The TJM editorial board invites mathematicians from all over the world to take part in this stimulating project by submitting high-level research articles.
