Enter the password that was sent to you by CIRM, then click on « *Join* »:

You are well connected

III - If you have been to the CIRM

In this case, you will probably have your connection to the CIRM WIFI already established. You will have trouble connecting to the network because your old password has expired.

Thus, please follow the steps below to get your new password:

- forget the CIRM wifi network
- turn off your computer completely
- start up your computer
- connect to CIRM wifi network and enter your new password
